

## TO WHOM IT MAY CONCERN

### Hereby we confirm that:

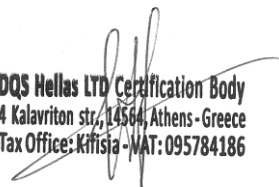

The certificate OEM 10109.4.3 issued for the company CLIMART S.R.L. is drawn up on the basis of the test report No. 6110 DE2, 6113 DE2, 6113 F2 of 4/11/2020.

The tests refer to natural circulation systems ("factory made" type) and in detail it is certified that:

- the distributed systems in the Solar Keymark Certification with the configuration names:  
**SMA.151.20.150/2 MQ, SMA.151.25.150/2.5 MQ**, are characterized by the fact that the type "150 L" data shown on the thermal storage label identifies the gross volume with 150 liters, while the useful capacity is 136 liters
- the distributed systems in the Solar Keymark Certification with the configuration names:  
**SMA.201.20.200/2 MQ, SMA.202.20.200/4 MQ, SMA.201.25.200/2.5 MQ, SMA.202.25.200/5 MQ**, are characterized by the fact that the type "200 L" data shown on the thermal storage label identifies the gross volume with 200 liters, while the useful capacity is 190 liters
- the distributed systems in the Solar Keymark Certification with the configuration names:  
**SMA.251.20.250/2 MQ, SMA.252.20.250/4 MQ, SMA.251.25.250/2.5 MQ, SMA.252.25.250/5 MQ, SMA.253.20.250/6 MQ**, are characterized by the fact that the type "250 L" data shown on the thermal storage label identifies the gross volume with 250 liters, while the useful capacity is 230 liters
- the distributed systems in the Solar Keymark Certification with the configuration names:  
**SMA.301.20.300/2 MQ, SMA.302.20.300/4 MQ, SMA.301.25.300/2.5 MQ, SMA.302.25.300/5 MQ, SMA.303.20.300/6 MQ, SMA.303.25.300/7.5 MQ**, are characterized by the fact that the type "300 L" data shown on the thermal storage label identifies the gross volume with 300 liters, while the useful capacity is 276 liters
